

Powerful and Compact Transmitter

Modern Setup and Condition Monitoring

Faster Data Transfer

Fast 200Hz update rate allows for improved efficiency and optimized weighing processes in any machine. This high speed of update enables up-to 10X's higher throughput of weighing data when compared to other devices, leading to higher overall operational throughput.

Quick Installation

Up and running in minutes through a user-friendly interface. The ACT100 is integrated with a webserver that enables more flexibility. Additionally, users benefit from remote access and servicing from anywhere.

Onboard Display Keypad

A built-in display and keypad provides easy setup and condition monitoring with real text messages. This also enables increased uptime when executing calibration, adjustment, or troubleshooting at the source.

Four LED indicators for one-view status allows increased insight into equipment operation.

Condition Monitoring

ACT100 includes many functions that report both running status and error conditions. In addition to the onboard display, the ACT100 includes I/O points that are mapped to error conditions and 24mA is used to indicate error condition.

ACT100 Weight Transmitter

Fast 4-20mA Analog Output

The ACT100 analog weight transmitter delivers accurate measurement at fast speeds. It provides modern service features remote access via Ethernet.

Choose the ACT100 and benefit from:

- Easy connection to PLCs and DCSS
- 4-20mA, 0-10V output @ 200Hz
- Remote setup via Integrated webserver
- Easy configuration via OLED display and keypad
- Operational insight - real text messages
- Space savings - compact housing – only 40mm wide
- Automated control through Fast digital IO
- Easy connection to most analog, strain-gage, scales
- CalFree™ weight free adjustment
- ATEX / IECEx / FM (ACT100xx only)
